

### Disinfection tank DT series

Continuous washing with disinfectant for effective removal of bacteria and parasite seeds.

- ✓ Suitable for stem and leafy vegetables.
- ✓ Continuous circulating water washing system.
- ✓ Air pressure with bubbling effect.
- ✓ Filtering system.
- ✓ Minimal water consumption because of recycling.
- ✓ Made entirely from stainless steel to ensure the highest hygiene.
- ✓ Dewatering conveyor belt.

## Vegetable Processing Equipment

- ✓ High capacity in a compact design.
- ✓ Capacity after customers' specifications.
- ✓ Minimum water consumption due to recycling water flow.
- ✓ Low maintenance costs because of few wearing parts.

Power consumption: 4.1 kWh

Water consumption: 40~ 50 Liter/min

Production rate: 300~2000 kg/h

Dimension: L 4310mm – W 1250mm - H 2140mm
